

# MPM-15 series

## Features

- 2.06"x1.07" compact size
- Medical safety approved (2 x MOPP) according to ANSI/AAMI ES60601-1 and IEC/EN60601-1
- Suitable for BF application with appropriate system consideration
- No load power consumption<0.075W (0.09W for 3.3V)
- Extremely low leakage current
- Wide operating temp. range -40 ~ +85  $^\circ C$
- EMI class B for class II configuration
- Protections: Short circuit / Overload / Over voltage / Over temperature
- · No minimum load required
- · 3 years warranty

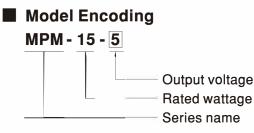

### Applications

- · Portable medical device
- Mobile clinical workstation
- Medical computer monitor
- · Medical examination instrument

#### Description

MPM-15 is a 15W high density and small size (52.4\*27.2\*24mm) AC/DC module type medical power supply series offered in pin type. It features the operation for 80~264VAC, a low no load power consumption less than 0.075W (0.09W for 3.3V), a high efficiency up to 87%, Class II (no FG) double insulation, outstanding dissipation and high lifespan thanks to the interior potting, 5G anti-vibration, high EMC performance, 4KVAC isolation, etc. The design observes IEC/EN60601-1 and ANSI/AAMI ES60601-1version three with 2xMOPP level and ultra-low leakage current (<80  $\mu$  A). It is very suitable for BF (patient contact) type medical device or relevant equipment.

Average output power should not exceed the rated power. noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1 μ f & 47 μ f parallel capacitor. e : includes set up tolerance, line regulation and load regulation. may be needed under low input voltages. Please check the derating curve for more details. urrent was measured form primary input to DC output. ient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(650) er supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still MC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies."
