

#### Features

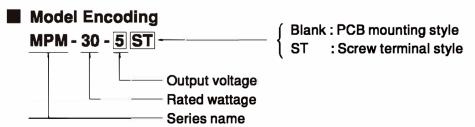

- \* 2.73"x1.53" compact size
- Medical safety approved (2 x MOPP) according to ANSI/AAMI ES60601-1 and IEC/EN60601-1
- Suitable for BF application with appropriate system consideration
- No load power consumption<0.075W</li>
- Extremely low leakage current
- Wide operating temp. range -40 ~ +85°C
- EMI class B for class  ${\rm II}$  configuration
- Protections: Short circuit / Overload / Over voltage
- No minimum load required
- 3 years warranty

# Applications

- Portable medical device
- Mobile clinical workstation
- Medical computer monitor
- Medical examination instrument

# Description

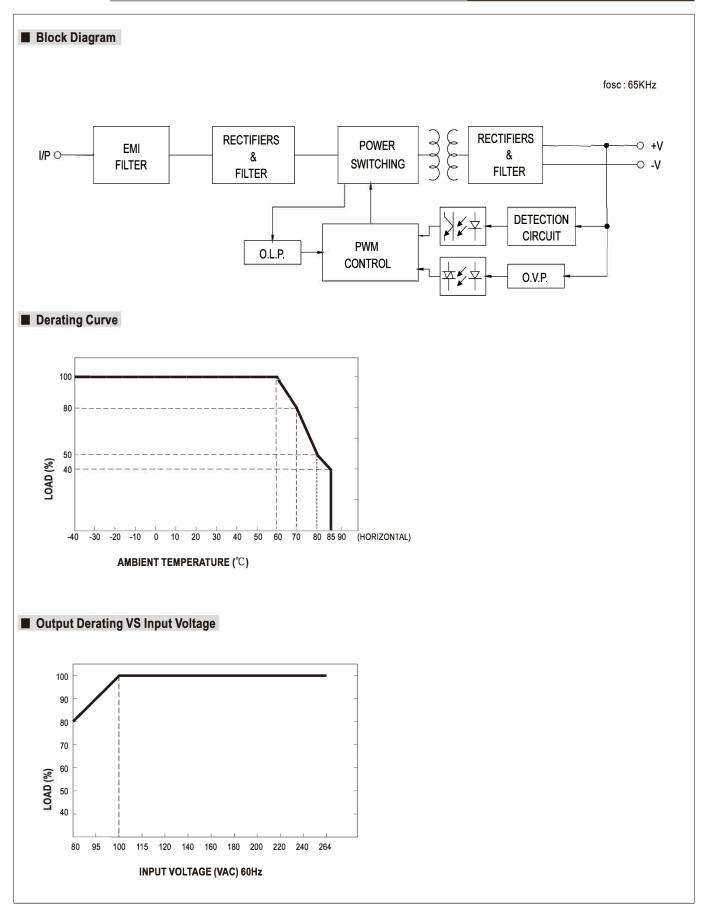

MPM-30 is a 30W high density and small size (69.5x39x24mm) AC/DC module type medical power supply series offered in pin type. It features the operation for 80~264VAC, a low no load power consumption less than 0.075W, a high efficiency up to 91%, Class II (no FG) double insulation, outstanding dissipation and high lifespan thanks to the interior potting, 5G anti-vibration, high EMC performance, 4KVAC isolation, etc. The design observes IEC/EN60601-1 and ANSI/AAMI ES60601-1 version three with 2xMOPP level and ultra-low leakage current ( $<80 \mu$  A). It is very suitable for BF (patient contact) type medical device or relevant equipment. In addition to PCB mounting style, MPM-30 series also offers the screw terminal style model (ST).

IOTE	No minimum load required.     3. 33% Duty cycle maximum     Ripple & noise are measure     Tolerance : includes set up	NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. and required.  maximum within every 30 seconds. Average output power should not exceed the rated power.  are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1 µ f & 47 µ f parallel capacitor.  udes set up tolerance, line regulation and load regulation.  e needed under low input voltages. Please check the derating curve for more details.  vas measured from primary input to DC output.  Imperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500) is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still actives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies."  http://www.meanwell.com)
